The GIQS project has achieved relevant scientific goals. The GIQS partners wish to share the acquired knowledge in a virtual webinar, with the aim to strengthen the collaboration with stakeholders and interested scientists and technicians working in the field of electrical metrology.

First session:
Wed 15 Dec 2021
13:30 - 15:30 CET (12:30-14:30 UTC)

Graphene quantum Hall devices

Second session:
Thu 16 Dec 2021
13:30 - 15:30 CET (12:30-14:30 UTC)

Impedance metrology

To subscribe: Send a mail to the organisers:
l.callegaro@inrim.it
klaus.pierz@ptb.de
you will receive the final program and the connection link!

The project stakeholders include metrology organisations, research centers, calibration laboratories, industries which are interested in the project outcome and give input to maximise its impact on the T&M community.
